The specialist rescue helping Lakeland, 'Working type' and other Terriers find their caring, forever homes

Sept 23

Be realistic if you are looking for a terrier these are 'working type' terriers. We save terriers lives many of them have bitten and many of our terriers need terrier owners who can get them. Our terriers can sit there as it is extremely damaging for both our terrier and the receiving family if they are over-estimated and returned within a week because our cautionary approach and measures are not followed. Delightful but need respect!

Spencer 6 year old who did well in his original family but became apprehensive after a vet appointment. His owners found his energy too intense..,he certainly is a wired Patterdale. Can be very loving on his terms. Small lad who will bring a lot of fun into an experienced terrier family who can help him to unwind & chill a bit. Settle now kennels & has many friends. Not for children & avoid strangers/ visitors he needs hands off approach. ON HIS TERMS & even then reserve as doesn't like fussing around the neck. Experienced terrier home on. **Focused ..on you!**

Stan is a classic Pattie. He looks a little rugged at the moment & has a docked tail which is quite a rarity. Bonds well shown confident handling & courteous manners. Finding his paws with our terrier experienced volunteers & his confidence will grow. Kennels has taken its toll and Stan need a therapy home. He is amenable Suspect Stan hasn't led a sheltered life but rubbed along with whoever he needed to rub along with. Just shy of new humans but watch him. **Our Man!**

Luna grew up with an alcoholic Luna carries this still but is working through her difficult beginnings. We use a muzzle in public again to allow her to round off her skills which in many cases are first time exposure. So many of our terriers emerge from novice or simply non terrier homes. Luna's owner was neglectful & no sense of her needs. Luna is catching up fast & being loved by all our walkers & staff as she begins to piece life together. **Moonshine**

Ralph 6 yrs old & a worried little Jack. Ralph wants to love but needs his space respected. Careful management: Can't take his collar or harness off without very experienced terrier handler so he can't bite. Not for children. Anxious; concerns are real to him. Meeting known people, he can forget himself & give a huge "smiley paws on your knees" greeting. Ralph has his own quiet room yes he can give passing dogs 'what for' but loves his own space, his walks & housetrained. **Worryguts sunbeam**

Roco 7 years old. Bought as a 'Chihuahua x pup'!!! or was his owners taken in? Roco is the Patterdale with a slight nervous streak which he has learned to control. Since he has been with us & ESPECIALLY in foster Roco has grown in confidence. No for children. Roco is enjoying letting his fur down, meeting & greeting and now has many doggie friends. Communicates when he needs his space. **Brilliant**

Johnny Johnny has matured in Rescue. He still can alert you meeting new situations but has learned to settle and meet calmly. He soon accommodates and adjusts to new situations. Needs reassurance and then loses his nerves and ventures forwards... his terrier boldness gives him courage to explore. Likewise he was shrill in voice which helps him to warn others he is there, but has learnt to calm his nerves. Loves to meet other dogs and roll on his back. Fostered with 2 other dogs.

Toby Mr Toblerone 9 years young and a real good looker. Needs his owner to get the measure of him and seek his permission and appreciate as with Patterdales intimacy and care is on their terms. Let a sleeping dog lie' He has had a few mishaps in his life but managed well and had fun-times. Sadly a 3 year old came into his life and his liberty was curtailed. He now is looking for new horizons and is a heart winner.

Mika 11 years old. A Patterdale owner would understand how to manage him & would reap the desserts. Mika is the "bees knees" of terriers. Needs a stress free life which is active & engaging. Mika has a job to do with anything that moves & is on the case. Mika has been in Rescue since he got out of the back gate & jumped up at a postman, both danced which prompted Mika to bite. Mika needs a muzzle when on his walk and vets because he can deflect onto his walker. Mika associates his muzzle with adventures.

Chanel ?5 years came from Spain in April. Another foreign dog where there was no one behind the family to pick up the pieces when they felt out of their depth. Rescuemedies / Terrierrescue continue to save foreign dogs with nowhere to go as their Rescuers only deal with the placement, not involved to care what happens to the dog. Well little Miss Chanel is a wonderful affectionate girl who just has some surface nerves with new approaches. She is building up many friendships here and it truly a delightful terrier miss!

and other Terriers find their caring, forever homes

Rocco 3 years old and spent too much time fired up in kennels. He needs an experience quiet home who can learn to work with his energy and give him space.. Patterdales have strong drives and need perceptive owners to get the measure of them. Rocco also would enjoy an active life to explore life to its full but always on the end of a lead so he is guaranteed to have supportive encounters and goes home with you for sure!

Pip 2 years old. Has had a broad scope upbringing living alongside chickens, cats, snakes, tortoises and older children. Pip however was shielded from visitors and has nerves with new people and vets. Changes in the family meant they could no longer home him as change in family circumstances. Pip has adjusted to kennel life and we are putting lots of work in to help him and become more trusting.

Teds Teds is bursting with alertness and energy. He finds it hard to contain it. Sadly within his soul he so needs human company and examining his behaviour he avoid being left and always wants to be with his person. Whilst he gets very hyped with leads he actually doesn't bit he need skilful management. He is a little shy by character but most people wouldn't see this

ALL OUR Terriers are strictly on lead and need strict exit management and terrier proof gardens. A terrier's life depends on this. Killed on the road: Cats/ Squirrels and terriers.

Don't be naïve or rise to pressure to let your terrier off lead, their life depends on you being responsible.
