### Piper Romanian xbreed DofB 15.01.21 Pied piper

- Piper is a native crossbreed but in UK terms we would suppose her as a small Collie x Lab
- She can have nerves with people which is difficult to comprehend as most people she is a receptive and gentle as can be
- Piper is an escape risk as has climbed a chain link fence so garden security and care is important. With settlement we suspect she will lose intent to go
- Family unit will be important and strategy with visitors may ne needed but she receives everyone into her kennel

- Full history from originating family
- Not for children
- Once owners get a measure on him terrific boy
