We have light at the end of our kennels.....

NEW Aug 20

Enquiries only via a completed our homing questionnaire www.staffierescue.co.uk under "How to offer a forever home" We need minimum donation of £175 at the time of adoption to support our many homeless dogs in kennels. We neuter all dogs & pay kennel costs. No paid staff; no expenses claimed by volunteers, Print out & put in a shop or car window

Lily is 7 years old. Life just hasn't worked out the way anyone wanted. Arrived in kennels as a 4 month pup awaiting a court case was released into Rescue at 1 year old. Lily has a little quirk to her character which means she can nip visitors But most she welcomes. When it happens it comes out of the blue with us saying sorry she hasn't done that for months and month. She needs to be kept away from dogs outside for the same reason she can suddenly have a go. Lily lives successfully with Mika a terrier who can occasionally yelp having had a little nip then all over. They play together and often sleep together. Lily doesn't make it easy for herself. She is a dear. **Enchanting**

Ruby around 7 years young. Hard life behind this girl that meant she was running stray fir a couple of weeks before caught. She has been overcoming her nerves as she has built up close friendships and has learned to trust and listen when told to leave her treasured branches which she sometimes grabs if opportunity presents itself. Ruby deserves a quiet home where she has regular but not too many people visiting so she can build a social circle win whom she trusts. Meeting outside via a treat and her nerves are calmed. Good within an urban setting. An amazing smile. **A real gentle-girl.**

Bonnie is just 4 years old. She carries nerves especially around the kennels and can lead grab to anchor her concerns. Bonnie is learning to be out and about in public and to see walks as times of interest and relaxation. Bonnie does bond well once she has been introduced and spent time with you. Currently fussy with her food but does take high value treats. Can be left and accepts reassurance through voice and touch though a little reticent initially. Bonnie has obviously lived a shelter existence . Reported to have lived with other dogs but in what capacity with all her nerves leaves more questions than answers. Single dog home. **A star!**

Betty is just turned 8 years old. She is desperate to be friends though has a few initial nerves in the home or kennel. Many people have been entering her kennel and she has shown acceptance and welcoming as this usually means food or walk. Came from Rescue at 6 months, proved too much but the brother's family took her in rather than her go back to Rescue. She was happy accepted a puppy and a baby in a year but had a go at the grown up dog when the family were packing to go away, and although she didn't do much hurt she lost her home over it. Needs a rock solid family who can offer Betty a gentle life without too many visitors. **Peach**

Bella is just coming up to 3 years old. Lively little Miss who is very loving around people and is settled in the home. Her energy levels have been high as a whippet Staffie interested in everything and eminently trainable with it as her mind is keen and receptive to praise and caution. Bella in her wild youth has obviously had an accident with her back leg which someone has treated. She has had caring and she was given to a lady with cats and other dogs but came into that flat situation with a bang, arriving on our doorstep the next morning. Bella loves to play can be left in a safe environment but actually needs company more than anything. **Sincere**

Buds is 4 years old. Grew up with his litter sister and came out when a cat strayed to their garden and was killed so booked in to be put to sleep. We save them but they were both unaccomplished so we parted them. Buds walked well with his sister but was visibly vulnerable alone. He also was traffic reactive. Buds has built confidence out walking on a muzzle and he is getting there. Buds will eat horse + dog poo, even wrapped in bags so a muzzle helps. He rarely eats his own and providing his environment is kept clean you shouldn't have a problem. It maybe due to his impoverished past. Our Buds sits waiting for HIS BIG chance.

Ollie nearly 4 years old. Ollie was owned by an alcoholic; despite growing up alongside a little boy, his past leave s him with nerves. Ollie needs a quiet family life, one owner and probably adopted close to build up & opportunity to meet and bond in a relationship. Ollie loves his walks and has walkers devoted to him whom he is relaxed around. We are trying to build up his social circle so we can stretch him and develop his inner confidence and trust. Loves his ball. Ollie is an EBT: Staffie and JRT Yes Ollie has all 3 breeds visible and commanding him, which isn't easy especially with his traumatic unpredictable past. Joyous boy

Summer is around 5 years old. She is a young strong lass who is on edge outside walking in the and with the unfamiliar. She needs low dog density so can be managed. In the kennel she plays with dogs through the fence but is awkward with a dog running off lead. We have managed this walking her on muzzle or simply keeping her away from dog as she may over respond. Only dog, good around people but ideally not living next door to other dogs and strict exit management so she doesn't get out an exit and runs on the street. Really like a terrier only a large one. A true beauty

Henry is 7 years old and believe it or not he has been in Rescue most of his life. He obviously grew up with a family who couldn't manage the young prime male and he went into the wrong rescue where he was crated and then rescue by another Rescue. He was regarded a spirited and leapy but over the years mellowed into the lovely chap we took on. With having been I kennels most of his life Henry can get excited in a home environment but after a few days defo settles. He wears a dogmatic head collar to kerb his pulling which basically manages it well (Like many Lab owners use). Henry is a love and is now enjoying weekend foster. Gem!

New Boy Harry is just 7 years old. Lost his home as a child trod on him when he was a sleep and the police didn't want his put to sleep as he is a gentle natured dog who had done so well. Obviously we can not home him with children but then we think he deserves a quieter life now where he is top of the agenda. Tested quite well meeting a cat. Relaxed around dogs. Peace

New boy Marco

Please complete a questionnaire if applying via [rescuemediesdogrescue](#)

Staffierescue is a specialist part of Rescuemedies (as is Terrierescue) and serves our homeless Staffie friends. Donations are always desperately needed. We hire kennels to bring staffies into safety & provide foster care where possible to help them to build their confidence & assess them fully - matching them with their perfect owners. Our Forum shows their progress and provides them with their own blog whilst in Rescue
