The specialist rescue helping Lakeland, 'Working type' and other Terriers find their caring, forever homes

NEW Aug 20

Be realistic if you are looking for a terrier these are 'working type' terriers. We save terriers lives many of them have bitten and many of our terriers need terrier owners who can get the measure of them to ensure they are not triggered into biting again. Our terriers can sit there for years as it is extremely damaging for both our terrier and the receiving family if they are over estimated and returned within a week because our cautionary approach and measures are not followed.

Roco 5 years old. Taken in as a 'Chihuahua x pup"! or was his owners taken in? Roco is the Patterdale with a slight nervous streak which he has learned to control. Since he has been with us and ESPECIALLY in foster Roco has grown in confidence. No for children unless owners are well versed in managing their kids around a tenacious Patterdale it's not easy. Roco is enjoying letting his fur down, meeting and greeting. Now messages with his sweet little gnashers on show when he needs his space. **Thriller**

Mika 9 years old. A Patterdale owner would understand how to manage him and would reap the desserts he is the "bees knees" in terriers. Needs a stress free life which is active, engaging and demanding. Mika has a job to do and is on the case with anything that moves. Mika has been in Rescue since he got out of the backgate and jumped up at a postman, both danced which prompted Mika to bite. Mika needs a muzzle when on his walk because he can deflect onto his walker and need a muzzle in the vets. Mika associates his muzzle with adventures. **200% terrier LOVE HIM!**

Ralph 4 yrs old and a worried little Jack. Ralph wants to love but gets lost in his mental concerns. Careful management: We can't take his collar or harness off without very experienced terrier people handling him so he can't bite. Not for children. Apparently used to be a carefree boy 'til a kennel spell and returned anxious of his world. His concerns are real to him. Meeting known people, he can forget himself and give a huge "smiley paws on your knees" greeting. Ralph is now in his own quiet room yes he can give passing dogs 'what for' but loves his own space, his walks and housetrained. **Worryguts sunbeam**

Eddie 4 years old. Grew up with an 80yr lady in a rarefied inclusive household. His owner died and he moved in with her 2 co-habiting sisters but dog novice. Eddie danced circles around them & ending up running out of front door and terrierizing children queuing up for school. Eddie has bitten twice when asleep on sofa and suddenly movement. Terrier savvy person will adore him and work with him and hopefully make sure he remains safely controlled. Has grown to enjoy walking with dogs. Enjoyed a day with a dog friendly Staffie owned by one of his walkers. **Steady Eddie**

Hardy is 4 years old. Hardy is an apt name for him as he has that air of self sufficiency when out and about. He has been in foster and his fosterer has the measure of him and more the truth Hardy has the measure of him. Hardy has been settling around 'high excitement' objects like off lead running dogs and traffic but still tells the Buses off if he is close to the road on his walk. Can bit has bitten but if you are terrier savvy you can work in with Hardy. Hardy is intelligent as Jacks so are and will light up your life. **Bright Spark!**

Basil around 11 years old and an Cockney lad. We don't know what Basil's past offered to him but he has nipped when concerned, but has built deep trust bonds. Needs a quiet life where his owner can indulge him, respect his space and have great times and great walks. He enjoys weekend foster breaks with boat trips the latest adage. As always we have to have a great deal of care homing a terrier who could bite but maintain Basil once settled trusts. No children and no visiting dogs. On Yumove for his joints **Sir Sniffalot**

Buddie is around 3 years old and an Irish boy. Buddie need special care around dealing with his collar and harness and providing that is an UNDERSTANDING Buddie is your friend. Another long stay terrier who has his terrier champions enjoying holidays and loves his social walks. Easy around dogs and could poss. settle with another dog. BUT with his shakey bite inhibition could be a factor should he get in a tizz. No children and an savvy owner who can tolerate an occasion mishaps **Prince Charming**

Red & Cola 7 years old and Patterdales to their paw tips. Lively, great fun and lots of mischief. They have lived in an urban setting well but needed muzzles due to off lead dogs flying over. Needs a family who have managed 2 terriers before as at times its can seem Red is killing Cola...as she has an inbuilt alarm, a precursor to 'Don't even think about it! Not for visiting dogs or young children. Cola on meds for epilepsy. Their needs should be central as 2 patterdales is a fulltime quest. **2 peas in a pod.**

Benji 2 years old. He grew up in a busy family which overwhelmed him and he came out a nervous boy. Once he gets over his nerves you are a friend for life. Same with dogs can be sparky on first encounter but soon settles and befriends. His future owners have nerves of steel to guide him through and let his 'nonsense' pass over them as they remind him "what a clever boy you are". Best not for children or cats. May pair with another' dog if they unaffected by his nerves **Baby!**

Marvin is 6. Purchased a Pattie pup on looks; had high expectations to rub along with tormenting children. Came out of his original home with a muzzle which he wore around the children. A terrier novice couple took him in, put a lot in but Marvin was always a few steps ahead and let himself down when grabbed going at the front door or when disturbed by raised voices. Marvin is sweet and loving. Patterdales need you to be ever aware of their responses to intrusion and disturbance to ensure their tempo doesn't become temper. **Never take it personally from a terrier!**

Tigga 1 year old. Sold in Scotland via a free ad, not chipped; not neutered; no history; no vac.card; and ofcourse no backup. Into a well meaning non terrier couple hooked on looks. Tigga came out 72 hours later; we organised transport to bring him to safety and prep. him. He failed 1st home with us as we were convinced a great family would rise to a Patterdale, sadly Tigga ran rings around them, dancing on their table tops! Now a good weight; we house him outside the kennel block that drove him crazy and he is finding himself. **WizzKid**

Rosie is just 3 years old and having a splashing time in Rescue. She is a springer x Terrier x Staffie and we have to say she has all the best of each breed in her. BUT she is high energy when on the move and can get over zealous with tennis balls and need her humans to be a few steps ahead of her to distract, exchange and if all else fails use her olbus oil under her noseshe drops it everytime! If you're looking for a quiet life think again. If a dog is your life; is your entertainment system and joy, then your life may turn up Rosie! Barky meeting dogs but have faith she does settle. Playful and she does have downtime honest. **Rosebud**

Zippy 16.6.16 how is that for a date of birth. He should be called Sweet sixteen. Zippy is everything Patterdale the active wired mind; keen alertness towards anything that moves and instinctive in responses. Ziggy has bitten as younger, he didn't show bite inhibition. He has grown up now and on the hole places more think time into his response and perhaps isn't as on edge. He wears a muzzle as he has deflected on to his walkers when excited by 'activity out in the field'. Ziggy has proved given love, give time and given forgiveness Zippy wins through. **Zipwire**

Fudge is 10 and has been let down by her owner who as wouldn't do a 15 min bus journey to the PDSA to get her skin regularly treated. Lived with puppies who are now 5 and 6 yrs old. Lived with babies upwards now older kids: And a Parrot. Owner had no faith in her as obviously didn't appreciate she had a brilliant terrier in her midst; in her mind untrustworthy dog. "Didn't take to kids messing around with her food" ...sure bless her heart. Fudge is looking forwards. We are treating her skin and it will need ongoing attention. Her spirit wins her over to all people. **Blossom**
